Part B for March 26

SUBJECT

Estimate for Rs 1, 29, 000 for the improvement of the Water Supply & Chitaldrug Town

1 To, The Chief Engineer, M & C Chitaldrug and the Comptroller
NOL 3241-31 dt 20/126
Sanctions the estimate referred to above

To, The

General and Revenue Secretariat | nil File No 148 of 1924

Serial No	
	No 9421/5 dy 2.1.25
	Forwarded
1	The Chief Engineer in his same forwards a project amounting to Rs 1,29,000 for the Water Supply to the Chittaldrug town for sanction with a note explaining the features of the project
	11 The project is composed of two main parts (1) giving an additional supply from the Ankli mutt valley at a cost of Rs 78,220 & (2) improving the existing supply at a cost of Rs 50,750
	The original scheme for which the loan was raised was abandoned and the Chittaldrug Municipality in Sept 22 decided to return part of the loan viz Rs 68,000 to the Subscribers and retain the balance for improving the existing water supply with a Govt grant of Rs 25,000/- The latter scheme was under scrutiny with the Chief Engineer & the same has now been received for sanction
Flag A Withdrawn.	Submitted for orders with reference to the loan amounting to Rs 138615- which is said to amount to Rs 138615- in the Savings Bank as sufficient for carrying out the work even though there may be some difficulty for the Govt to find their quota of the loan
R Q	Board's letter 4/1/25

Contn Sheet

dy 31.1.25

6241

There seems to be money available for the carrying out of the work even without first grant. As the amount said to be available was Rs 138875- (vide Hy Qr 2); but the Minister seems to desire to avail himself of a first grant. The question of first grant can only be considered next year as no money is available for here grant now

Extract from the note of the Financial Secretary dated 4.9.25 in G.R. file 1031 of 1922 D.O. 2364

54 The Chitaldrug Town Municipality Water Supply loan is the next to be considered This is a short-period loan and falls due for discharge in 1931 The amount involved is a lakh and a half The Water Supply Project has not been taken up. The money has been deposited in the Bank of Mysore which allows 5 per cent interest while the rate to be paid to the bond-holders is 6 per cent The excess of one percent is advanced by Govt and held at debit of a suspense account This arrangement is not satisfactory The excess charge on account of interest should be borne by the Board ~~of~~ or by Government When the works are going to be taken up, is not known Interest and repayment of principal are both guaranteed by Government in this case If the money is not spent until 1931, the question of repayment presents no difficulty as the proceeds of the loan itself are available for repayment. If the loan is repaid from the loan proceeds no purpose will have been served by having raised the loan This position is unsatisfactory The matter requires consideration in ~~in~~ the Local & Legislative Secretariat

Subject.-

Improvement of Water Supply to Chitaldrug Town

Extract from the Proceedings of the Council is put up

Forwarded with compliments, to the Financial Secretary to Government, under paragraph 9 * of the Government Order No G 17572 8—G M 676 17 1, dated 22nd June 1918

By Order,

Chief Secretary to Government

9 ( ) If the views expressed by the Financial Secretary in any case, whether original or un-officially referred to or not accepted by the Member of Government in charge or by the Dewan and Members of Council as the case may be the file containing the discussion shall be sent to the Financial Secretary a second time in order to enable him in cases in which he considers that the orders proposed to be issued are opposed to financial rules of Government or to recognised financial principles or for other reasons of a financial nature are open to objection to record a respectful representation to that effect which will be placed by the Dewan before His Highness the Maharaja for consideration

(f) All cases sent to the Financial Secretary under this rule should be treated as immediate and returned to the Department concerned within three days of receipt

8) For repayment of the loan already raised by it, the Municipality is promised, according to the opinion of the Council, a loan to be advanced by Government equal to "the amount of the loan less the sum of Rs 35,000 promised by Government " The amount of the loan is -- Rs 1,47,000 The loan promised is therefore Rs 1,47,000 - Rs 35,000 = Rs 1,12,000

9) The cost of the present estimate is Rs 1,29,000 If a Government contribution of Rs 35,000 is allowed, the net cost of the scheme to be borne by the Municipality will be ---- Rs 1,29,000 - Rs 35,000 = Rs 94,000

10) A saving of Rs 10,000 is anticipated "as the present cost of iron pipes is low" Then again, it is stated that there is even a possibility of the third stage of the scheme not being required altogether and a saving of Rs 40.000 being made on the estimate If these savings are realised, the actual cost to be borne by the Municipality will only be Rs 94,000 - Rs 50,000 = Rs 44,000

Serial No

11) On the present data, therefore, the Municipality would require for repayment, a sum ~~xxxxxxxi~~ varying between Rs 94,000 and Rs 44,000, according to the amount of ~~realised~~ savings on the estimate$ ~~realis~~ ~~ed~~ The balance of Rs 1,47,000 - 94,000 = 53,000 or Rs 1,47,000 - 44,000 = Rs 1,03,000 would be available in the form of the unused loan itself I do not therefore understand why a promise of advancing a loan of Rs 1,47,000 - Rs 35,000 = Rs 1,12,000 should now be made

12) The sinking fund for the repayment of the Government loan is required to be built up "within a period of not more than 25 years from next year" Whatever loan is required by the Municipality from Government for repaying its public loan, will be wanted only in 1931 and in the meantime there will be no Government loan requiring a sinking fund I do not, therefore, understand why ~~xxprxxx~~ the provision of a sinking fund for the Government loan is required from next year

13) Whatever provision the Municipality can or should make from its annual revenues from next year for a sinking fund is really required for the public loan and this resource will ~~therefore~~ reduce the amount which the Municipality will have to borrow from Govt in 1931 for repaying its public loan

14) It will be seen from what is stated above that the position in respect of the repayment of the public loan of the Municipality is uncertain

in several respects and all that is now required is to (1) convey an assurance to the Municipality that Government will be preapred, if necessar to advance whatever amount may be required for re payment of its public loan in 1931 on conditions relating to interest and period of repayment which may be fixed at the time, and, (2) insist upon the Municipality providing in its annual budgets from now the maximum amount it can spare for repayment of its public loan and investing the contributions and earning interest upon them

Improvement of water Supply to Chitaldrug Town.

OPINION OF THE COUNCIL

(6) Administrative sanction may be given to the scheme subject to the following conditions.--

The amount of the loan less the sum of Rs.35,000 promised by Government will be advanced by Government as a loan for repaying the Municipal loan at the end of the period of the (present) loan provided the Municipality is able to make satisfactory arrangements for paying the interest and providing a Sinking Fund for payment of the loan from Government within a period of not more than 25 years from next year

(Signed) A. R. BANERJI,

Dewan of Mysore.

(4) with S-SW & 13/12/25

"EXTRACT 451~

Chief Secretary to Government

WD 1471—GPB—2 000—1-8 91

Submitted to His Highness.

(b) In Government Order No 5243-4/41 93-14-26 dated the 18th January 1916, the Chitaldrug Municipality was authorised to raise a loan of L. one lakh for the Improvement of Water-supply to Chitaldrug Town The amount actually raised is about 1¼ lakhs. This loan has been kept as a fixed deposit in the Mysore Bank with interest at 5 per cent per annum It is reported that the difference between the guaranteed interest and that received from the Mysore Bank, viz 1 per cent has been advanced by Government and held at the debit of a suspense account

On page 56 of my tour notes in the Chitaldrug District, I have given a full history of the water-supply scheme As suggested by me to the local officers the possibility of having a cheaper estimate was investigated and a project has now been prepared for supplementing the water-supply to the Chitaldrug town, by constructing a small reservoir in the Ankali Kutt valley and utilising the springs there The rough estimate of the project amounts to Rs 1,29,000 but the Chief Engineer expects to reduce the cost by about Rs 10,000 as there is a fall in the price of cast iron pipes The Secretary for Public Works Department suggests that administrative sanction may be given to the estimates, subject to the condition that if the anticipated supply proves satisfactory from now to the end of next September, on the result of gauging and appears dependable, further action may be taken for the execution of the scheme

3 The Municipal Council have resolved as follows, when this scheme was placed before them in the year 1923 --

"Resolved that for reasons given by the Executive Engineer the scheme for supplying water from the Ankli Kutt be approved, as also the scheme for improving the present supply from the Hirenahankere and the Voddu with provision for filtration and the [illegible] provisional estimates amounting to Rs. — Rs.120,000 be sanctioned The Municipal Council further resolve that in consideration of the fact that the above two schemes

are promising and as they are convinced that these schemes are necessary for improving the water supply of the town and as the Council is also anxious to take up a satisfactory scheme once for all at the earliest opportunity, ~~that~~ Government be requested to allow the Municipality to utilise the fund already raised by means of a loan by the Municipality, less Rs 35,000 which has been graciously promised by Government towards the improvement of the water supply to the Town "

4 The loan becomes payable in the year 1931 and as no sinking fund has been provided for repayment of the loan if any portion of the loan is now spent in carrying out the water-supply project, the Municipal Council may not have sufficient resources from which they can discharge the loan when it falls due The Municipal Council have stated that they can set aside only Rs 2000 towards the sinking fund and the total amount which may thus be provided before the loan becomes due, i e , for the next 6 years, is only Rs 12,000 The Municipality have therefore been informed by an order issued in the Local & Legislative Secretariat that as they are not able to provide a sufficient sinking fund for the discharge of the loan, it would not be desirable for the Municipal Council to incur any expenditure from the loan But when the papers came up to me in the Public Works Department, as it was not desirable to delay the project, I had the questions further investigated as to how the work may be proceeded with and also what satisfactory arrangements may be made at the same time for meeting the loan when it becomes due

5 As pointed out by the Financial Secretary, if the cost of the scheme is likely to be only Rs 119,000, there being a likelihood of a savings of Rs 10,000 by using cast-iron pipes and the Government give a grant of Rs 35,000 as already promised there will be a balance of Rs 119,000 - 35,000 or only Rs 84,000 to be spent from the loan As the amount of the loan is 1½ lakhs of rupees there will be an unspent balance of Rs 66,000 available out of that loan It is also stated that it may not be necessary to carry out the third stage of the project, viz , the construction of filters and service reservoir, and in this way, a further
